EU Declaration of Conformity for Valves and Valve Manifolds

SPX Flow Technology Germany GmbH
Gottlieb-Daimler-Str. 13, D-59439 Holzwickede
herewith declares that the

**APV double seal and double seat valves of the series
SD4, SDT4, SDU4, SDMS4, SDMSU4, SDTMS4, SWcip4, DSV,
DA4, D4 SL, D4, DA3, DA3SLD, DE3, DEU3, DET3, DKR2, DKRT2, DKRH2**
in the nominal diameters DN 25 - 150, ISO 1" – 6" and 1 Sh5 - 6 Sh5

APV butterfly valves of the series SV1 and SVS1F, SVL and SVSL
in the nominal diameters DN 25 - 100, DN 125 - 250 and ISO 1" – 4"

APV ball valves of the series KHI, KHV
in the nominal diameters DN 15 - 100

**APV single seat, diaphragm and spring loaded valves of the series
S2, SW4, SWhp4, SW4DPF, SWmini4, SWT4, SWS4, MF4, MS4, MSP4, AP/T1, CPV,
RG4, RG4DPF, RGMS4, RGE4, RGE4DPF, RGEMS4, PR2, PRD2, SI2, UF/R3, VRA/H**
in the nominal diameters DN 10 - 150, ISO 1/2" – 4" and 1 Sh5 - 6 Sh5

and the valve manifolds installed thereof

meet the requirements of the Directives 2006/42/EC (superseding 89/392/EEC
and 98/37/EC) and ProdSG (superseding GPSG - 9.GPSGV).

For official inspections, SPX FLOW presents
a technical documentation according to Appendix VII of the Machinery Directive,
this documentation consisting of documents of the development and construction,
description of measures taken to meet the conformity and to correspond with
the basic requirements on safety and health, incl. an analysis of the risks,
as well as an operating manual with safety instructions.

The conformity of the valves and valve manifolds is guaranteed.

Authorised person for the documentation:
Frank Baumbach

SPX Flow Technology Germany GmbH

1. General Terms

This instruction manual should be read carefully by the competent operating and maintenance personnel.

We point out that we will not accept any liability for damage or malfunctions resulting from the non-compliance with this instruction manual.

Descriptions and data given herein are subject to technical changes..

2. Safety Instructions

The valve must be assembled, operated, dismantled, maintained and serviced only by competent, trained personnel.

Please contact your local SPX FLOW site if necessary.

Danger!

- The technical safety symbol draws your attention to important directions for operating safety. You will find it wherever the activities described are bearing health hazards or risks for persons or material assets.

- Do not reach into the open valve or yoke!

Risk of injury by suddenly operating valve. In dismantled state there is the risk of bruising at movable parts of the valve.

Attention!

Valve design NC (normally closed): Control the actuator with air before releasing the housing screws.

- Before any maintenance work, the line and cleaning system must be depressurized and discharged if possible.
- If the diaphragm is damaged, leakages will emerge from the leakage bore in the yoke area.
- Electric and pneumatic connections must be separated.
- Observe service instructions to ensure safe maintenance of the valve.
- Schedule regular valve maintenance including the replacement of all seals in order to prevent leakages of any type.

2. Safety Instructions

Attention! Welded actuators are preloaded by spring force.

**Opening of the actuators is strictly forbidden.
Danger to life!**

Actuators which are no longer used and / or defective must be disposed in professional manner.

Defective actuators must be returned to your SPX FLOW company for their professional disposal and free of charge for you.

Contact your local SPX FLOW company.

3. Intended Use

The intended use as field of application of the diaphragm valve is the shut-off of pipeline sections.

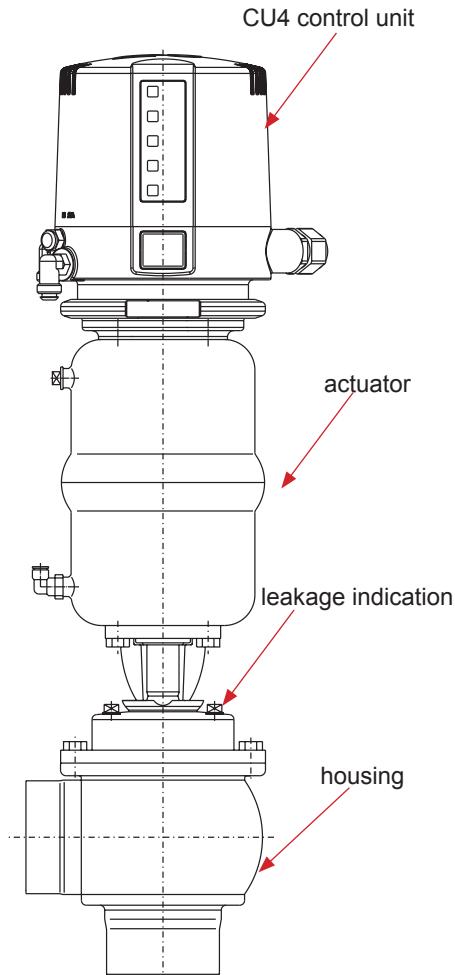

Unauthorized, structural changes at the valve will affect safety and the intended functionality of the valves and are **not** permissible.

Authorizations and External Approvals

To view the certifications for this and other innovative SPX FLOW products, visit
<https://www.spxflow.com/en/apv/about-us/certifications/>

4. Mode of Operation

DELTA MS4

4.1. General terms

DELTA MS4 diaphragm valves have been designed for use in the brewing and beverage industries, in the dairy and food industries as well as for chemical and pharmaceutical applications.

The field of application of the DELTA MS4 valve comprises the safe shut-off of pipeline sections.

Diaphragm valves offer optimum product protection in hygienic and aseptic applications. Product safety is provided by the hermetic separation of the product chamber to the exterior (atmosphere) by means of a diaphragm with fan support.

The standard MS4 valve series is equipped with a valve position indication.

As an option, a control unit can be installed on the actuator.

- Operation by pneumatic actuator with air connection, reset by spring force. The actuator is generally mounted in normally closed (NC) manner.
- Through different assembly of the actuator, the following designs are possible:
NC: actuator normally closed (NC); air-to-raise, spring-to-lower
NO: actuator normally open (NO); air-to-lower, spring-to-raise
- The inner parts of the actuator are maintenance-free.
- In order to prevent pressure hammers, the valve should be closed against the flow direction of the medium.
- Leakages at the diaphragm are indicated in the yoke area through a leakage drain.
- Different valve designs are available:

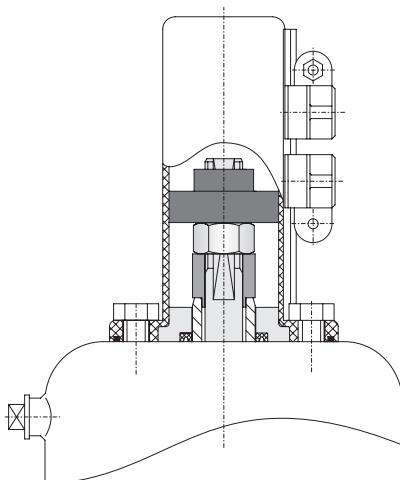

Single seat valves:	DELTA MS4
	DELTA MSP4
	(with diaphragm shaft made of PTFE)
	DELTA MSR4
	(with regulating cone)

Tank outlet valves:	DELTA MST4
	DELTA MSTP4
	(with diaphragm shaft made of PTFE)

Change-over valves:	DELTA MSES4
---------------------	-------------

5. Auxiliary Equipment

fig. 5.1.

5.1. Valve position indication (fig. 5.1.)

For the valve position indication a proximity switch support can be installed direct at the actuator.

Proximity switches to signal the limit position of the valve seat can be installed at the proximity switch holder (PSH) if required.

We recommend to use one of our APV standard types:
operating distance : 5mm / diameter: 11mm.

Operating voltage: 10 - 30 VDC

Output: operating current pnp - positive switching

Connection: moulded cable 5 m long

Protective type: IP 67

Reference number: 08 - 60 - 011/93; H16223

If the customer decides to use a valve position indicator other than APV type, we cannot take over any liability for any malfunctions.

5.2. Control Unit (fig. 5.2.)

The installation of a control unit on the MS4 valve is possible.

The following different designs are available:

fig. 5.2.

CU3 control unit

Direct Connect reference number; ID-No.	CU41-S-Direct Connect 08-45-100/93; H320460
Profibus reference number; ID-No.	CU31-Profibus 08 - 45 - 001/93; H315495
Device Net reference number; ID-No.	CU31-Device Net 16 - 31 - 240/93; H209422
AS-interface extended reference number; ID-No.	CU41-S-AS-i extended 08 - 45 - 110/93; H320467

For the installation of the control unit on the MS4 valve an adapter is required:

CU4 control unit

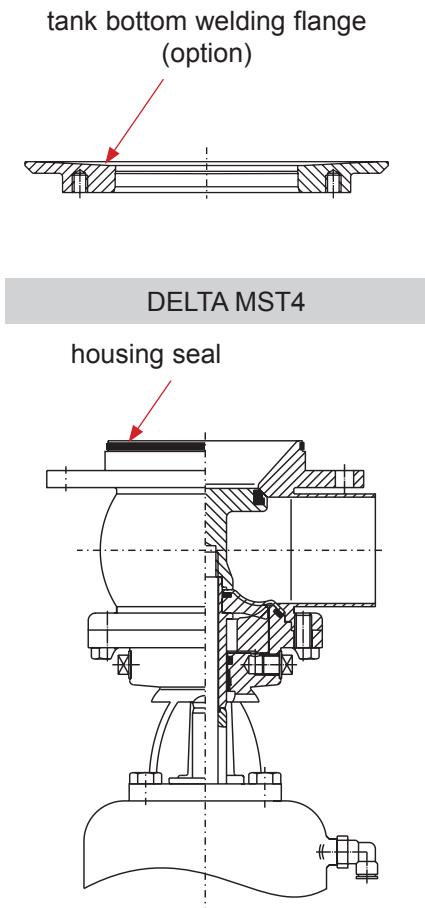

Designation: reference number:	CU3 adapter SW4 / M4 08-48-480/93; H315806
Designation: reference number:	CU4-S adapter for DN25/1"-100/4" 08-48-600/93; H320474

5. Auxiliary Equipment

5.3. Tank bottom welding flange for the valve series MST4 and MSTP4

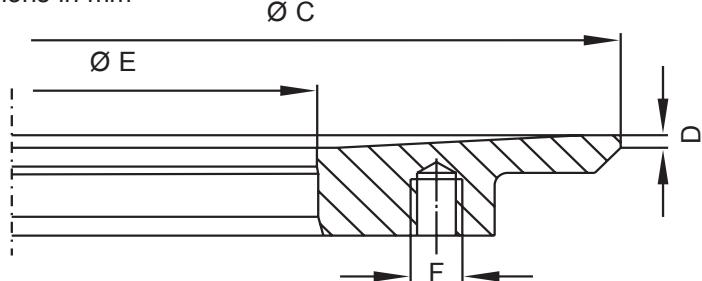

The tank bottom welded flange does not form part of the scope of supply of a valve and can be ordered with the following reference / ID number:

DN	Inch	\varnothing C	D	\varnothing E	F	Reference number
25	1"	148	2	66	M8	31B 15-01-391/42 H157269
40	1,5"	168	2	78	M8	31B 15-01-441/42 H157270
50	2"	188	2	94	M8	31B 15-01-491/42 H157260
65	2,5", 3"	228	2	109	M10	31B 15-01-541/42 H156931
80	–	258	2	128	M10	31B 15-01-641/42 H157271
100	4"	288	2	159	M10	31B 15-01-691/42 H157272

tank bottom welding flange
(option)

Dimensions in mm

5.4. Connections

Beside the housings with weld ends, the following connections are alternatively available:

- threaded connection according to DIN 11851
- threaded connection IDF / ISS according to ISO 2853
- threaded connection RJT according to BS 4825-5
- threaded connection SMS
- threaded connection according to DS 722
- flange connection FGN1 DIN
- flange connection FGN1 Inch
- clamp connection according to DIN 32676
- clamp connection according to ISO 2852

6. Cleaning

6.1. Cleaning recommendation

Flow areas

The passages of the valve are cleaned by the cleaning liquid during cleaning of the connected pipelines.

Depending on the degree and constituents of soiling, the cleaning liquids, times and processes must be scheduled for the individual application.

The compatibility of the individually selected cleaning processes and liquids with the respectively used seals must be verified.

Under normal conditions, 15 valves DN 25/1" - 100/4" can be cleaned via one spray distribution line DN 25.

7. Installation

Installation has to be undertaken in such a way that fluids can drain off the valve housing and should preferably be done in vertical position.

- The valve housing can be welded direct into the pipeline (completely dismantable valve insert).

Attention! Observe welding instructions.

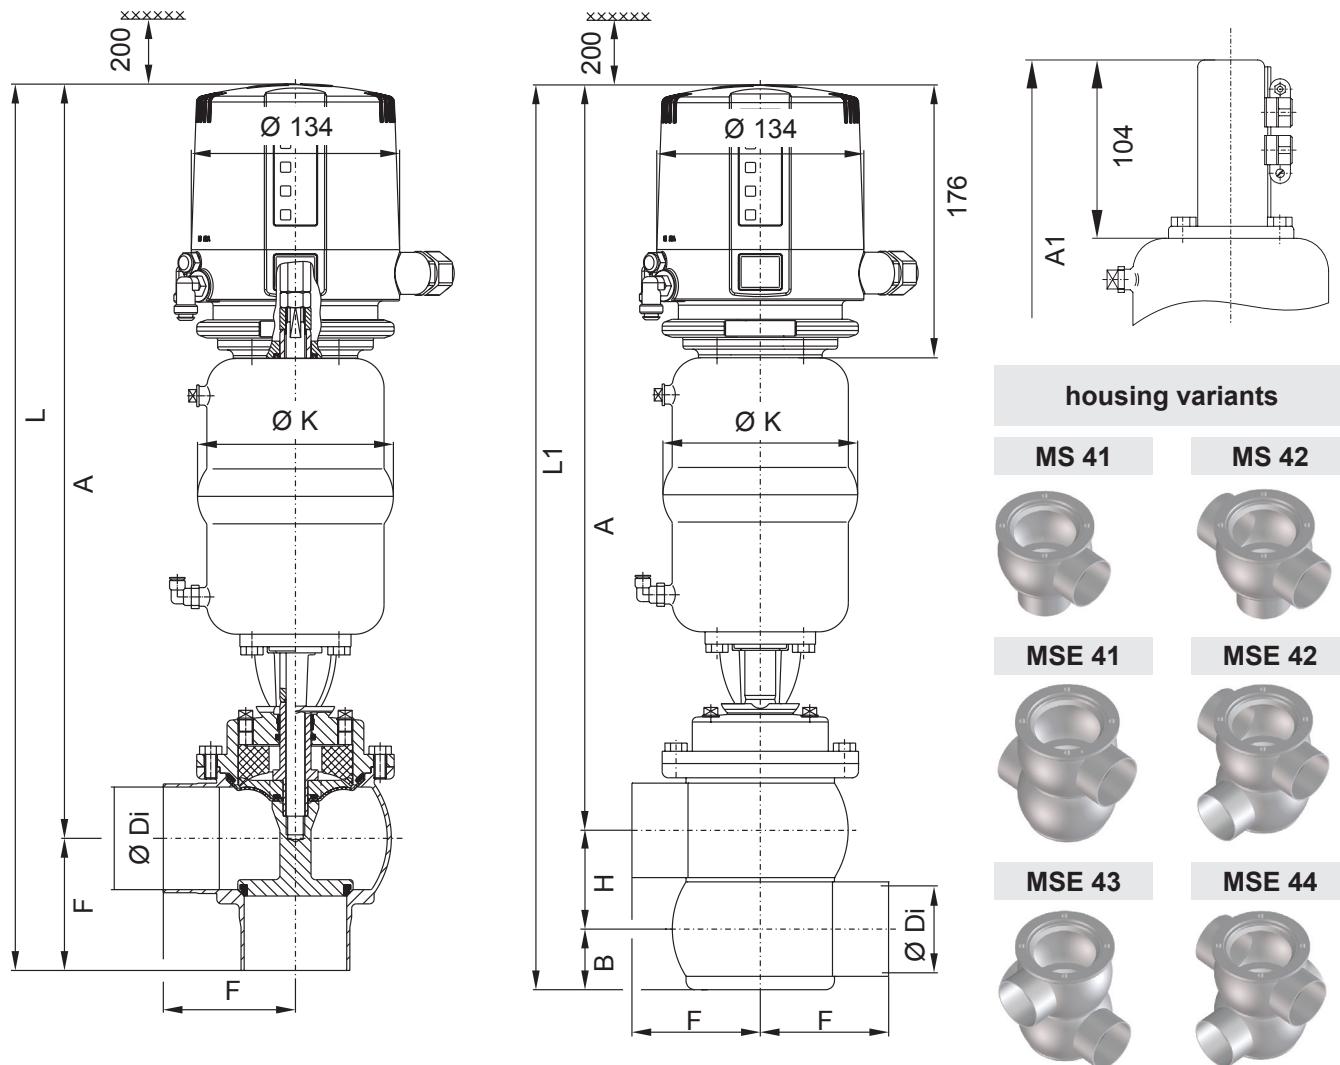

7.1. Welding Instructions

MS4

- Before welding of the valve, the valve insert must be dismantled from the housing. Careful handling to avoid damage to the parts is necessary.
- Welding should only be carried out by certified welders (DIN EN ISO9606-1). (seam quality DIN EN ISO 5817)
- The welding of the valve housings must be undertaken in such a way that the valve body is not deformed.
- The preparation of the weld seam up to 3 mm thickness must be carried out in butt manner as a square butt joint without air. (Consider shrinkage!)
- TIG orbital welding is best.
- After welding of the valve housing or of the mating flanges and after work at the pipelines, the corresponding parts of the installation or pipeline must be cleaned from welding residues and soiling. If these cleaning instructions are not observed, welding residues and dirt particles can settle in the valve and cause damage.
- Any damage resulting from the non-observance of these welding instructions is not subject to our guarantee.
- Welding directives for aseptic application areas of the AWS/ANSI regulations and EHEDG guidelines must be observed.

8. Dimensions / Weights

9. Technical Data

9.1. General

Product-wetted parts:	1.4404 (DIN EN 10088)
Other parts:	1.4301 (DIN EN 10088)
Seals: standard design	EPDM
Option:	HNBR, VMQ, FPM
Diaphragm:	PTFE (TFM 1705)
Actuator:	1.4301 (DIN EN 10088)
max. line pressure:	10 bar
max. operating temperature:	135 °C EPDM, HNBR *FPM, *VMQ
short-term load:	140 °C EPDM, HNBR *FPM, *VMQ *(no steam)

Air connection (for hose): 6 x 1 mm
 max. pneumatic air pressure: 8 bar
 min. pneumatic air pressure: 6 bar

Leakage indication in yoke area: G1/8"

9.2. Specification of compressed air quality

compressed air quality:	quality class acc. to DIN ISO 8573-1
content of solid particles:	Quality Class 3 max. size of solid particles per m ³ 10000 of 0.5 µm < d < 1.0 µm 500 of 1.0 µm < d < 5.0 µm
content of water:	Quality Class 3 max. dew point temperature -20 °C For installations at lower temperatures or at higher altitudes, additional measures must be considered to reduce the pressure dew point accordingly.
content of oil:	Quality Class 1 max. 0.01 mg/m ³

**The oil applied must be compatible with Polyurethane
elastomer materials.**

9. Technical Data

9.3. Closing times for single seat and change-over valves DELTA MS4

For valves equipped with a control unit DELTA CU, the opening and closing times can be increased by adjustment of the throttling screw at the solenoid valve.

		closing times in sec. pneumatic air pressure 6 bar	
		hose length in meter	
DN	Inch	1 m	10 m
25	1"	1	2

10. Maintenance

The maintenance intervals depend on the corresponding application and are to be determined by the user himself carrying out temporary checks.

- The valve must not be cleaned with products containing abrasive or polishing material. Especially the valve shaft must not, under any circumstances, be cleaned with such agents. Damage of the valve shaft can lead to leakages.
- Replacement of seals according to Service Instructions. Customer stock keeping of spare seals is recommended. For valve service we supply complete seal kits including seal grease (see spare parts lists).

10. Maintenance

Scan for MS4 Valve
Maintenance Video

Required tools:

- 1x wrench SW13
- 1x wrench SW17
- 1x wrench SW19
- 1x wrench SW30
- 1x strap wrench
- cleaning rag as well as a low solution of a suitable cleaning agent (observe safety data sheet of cleaning liquid manufacturer).

- All seals must be provided with a thin layer of grease before their installation.

Recommendation:

APV assembly grease for EPDM, HNBR and FPM (Viton)
(0,75 kg/ tin - ref.-No. 000 70-01-019/93; H147382)
(60 g/ tube - ref.-No. 000 70-01-018/93; H147381)

APV assembly grease for VMQ (Silicone)

(0,60kg/ tin - ref.-No. 000 70-01-017/93; H147380)
(60 g/ tube - ref.-No. 000 70-01-016/93; H147379)

! Do not use grease containing mineral oil for EPDM seals.

! Do not use grease on Silicone oil basis for VMQ seals.

! No matter what type of application, use only those greases being suited for the respective seal material !

Recommendation for screw retention:

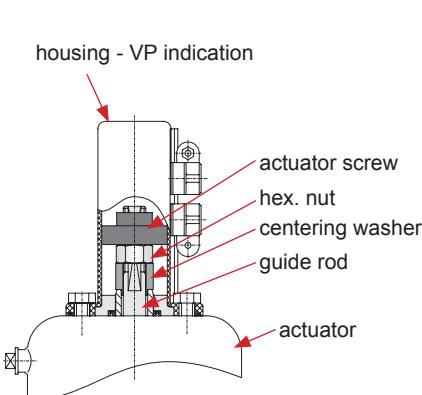

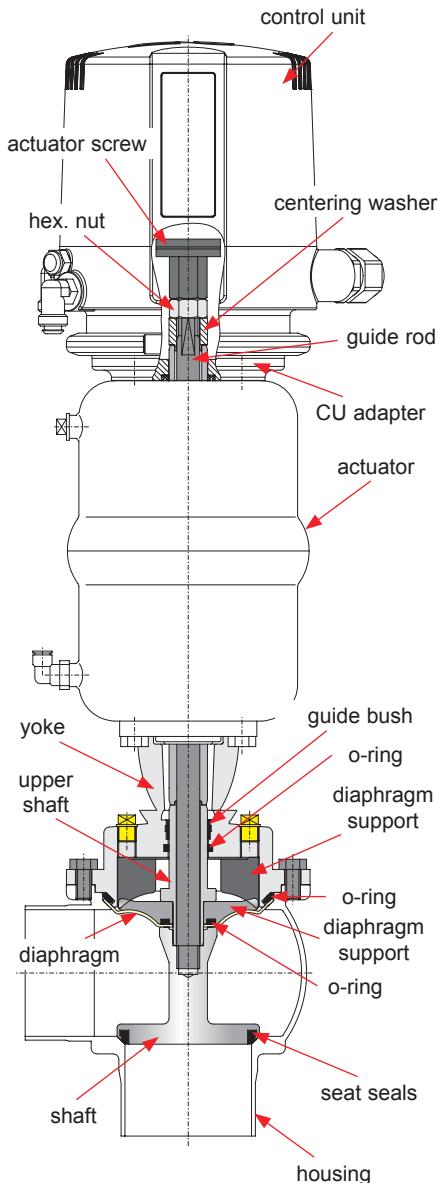

Type: Loctite 243 semi-solid
(50ml - ref.-No. 00070-01-111/93; H206336)

10.1. Assembly tool

To simplify the installation of the seat seal, the following assembly tools are available.

Assembly tool M4		
DN	Inch	ref.-No.; ID-No.
25	1"	000 51-13-110/17 ; H179465
40	1,5"	000 51-13-111/17 ; H179466
50	2"	000 51-13-112/17 ; H179467
65	2,5"	000 51-13-113/17 ; H179469
	3"	000 51-13-121/17 ; H179470
80		000 51-13-114/17 ; H179471
100	4"	000 51-13-115/17 ; H179472

11. Service Instructions

11.1. Dismantling from the line system - MS4

The reference numbers refer to the spare parts drawings

MS4: DIN design RN 01.064.9
Inch design RN 01.064.9-1
3A-Inch design RN 01.064.9-2

1. Shut off the line pressure and discharge lines if possible.

2. NC version: Control actuator with air.

 **Do not touch movable parts!**
Risk of injury.

3. Remove the hex. screws (14) and lift the complete valve insert with actuator out of the housing

4. NC version: **Shut off compressed air and remove compressed air connection.**

5. **Design with Control Unit:**

Remove the control unit.

Design with valve position indicator:

Remove the proximity switches. Detach the indicator housing (**proximity switch support**) from the actuator.

11.2. Dismantling of wear parts (product-wetted parts)

1. **Design with control unit and valve position indication:**

At first, unscrew the actuator screw. Release the hex. nut (22), while holding up the centering washer (21). Remove the centering washer.

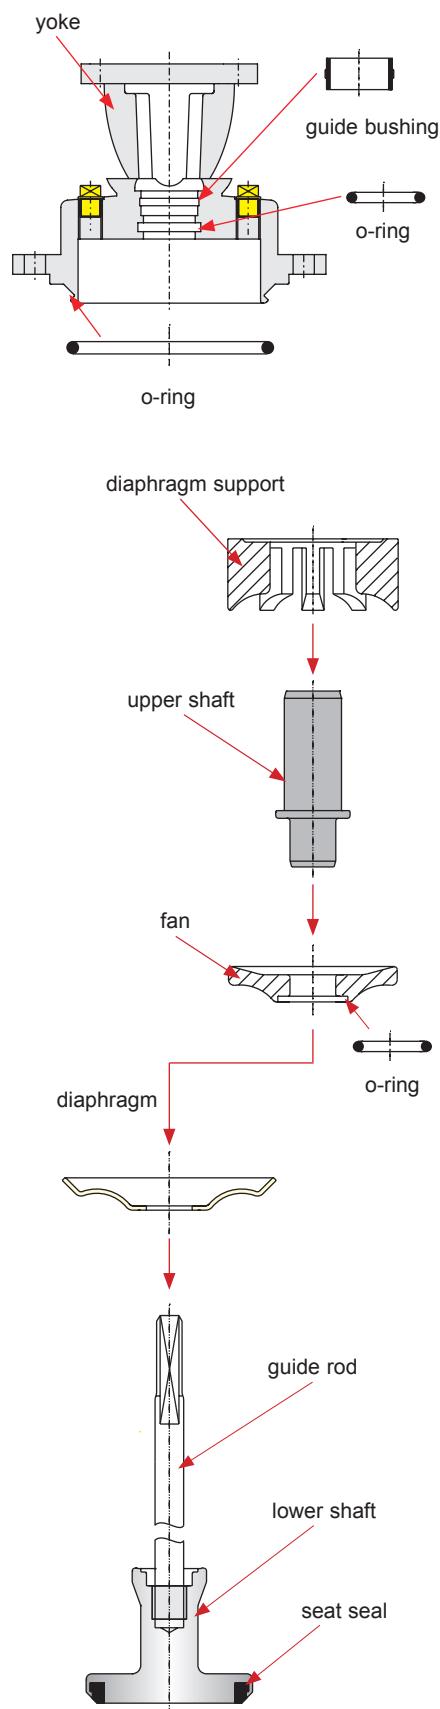

2. Extract the shaft with guide rod (3), diaphragm (5), fan (6), upper shaft (4) and diaphragm support (7) from the actuator (17). Remove the seat seal (2) and o-ring (16).

3. Remove the yoke (9) from the actuator (17).
The actuator can be maintained.
(see 12. Service Instructions - Actuator).

4. Detach the o-rings (15, 13) and guide bush (11) from the yoke (9).

5. Clean the valve housing, yoke, actuator and shaft with a low solution of a cleaning agent. Never use cleaning agents containing abrasive or polishing material.

11. Service Instructions

11.3. Installation of seals and assembly of valve

All seals must be provided with a thin layer of grease before their installation.

1. Insert the guide bush (11) and o-ring (13) in the yoke (9). Insert the o-ring (15) in the groove of the yoke. Fasten the yoke (9) at the actuator (17).
2. Install the seat seal (2) in the lower valve shaft (3). (see Service Instructions 11.)
3. Install the o-ring (16) in the fan (6). Place diaphragm and fan on the upper shaft.
4. Wind the protective pipe over the thread of the guide rod.
5. Pass the guide rod through the upper shaft with diaphragm and fan until it stops on the lower shaft. Insert the diaphragm support into the fan.

! Tooothing of fan and diaphragm support must interlock.

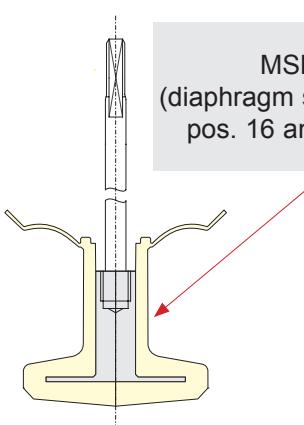

- Insert the pre-assembled lower shaft with guide rod, diaphragm, fan, upper shaft and diaphragm support through the yoke (9) and actuator (17).

The upper shaft must be guided through the guide bush into the yoke in smooth-running manner. In case of mechanical stiffness, check the right fit of the guide bush.

Design with control unit and valve position indication Place the centering washer (21). Apply a drop of a screw locker, e.g. type Loctite, semi-solid, on the thread of the guide rod. Screw on the hex. nut (22) and fasten it with a tightening torque of $M_d = 40 \text{ Nm}$. Hold up the centering washer during this process.

- !** Control Unit: Fasten the plastic actuator screw.
! Valve position indicator: Fasten the metallic actuator screw.

MSP4 design
(diaphragm shaft out of PTFE)
pos. 16 and 5 are omitted

11. Service Instructions

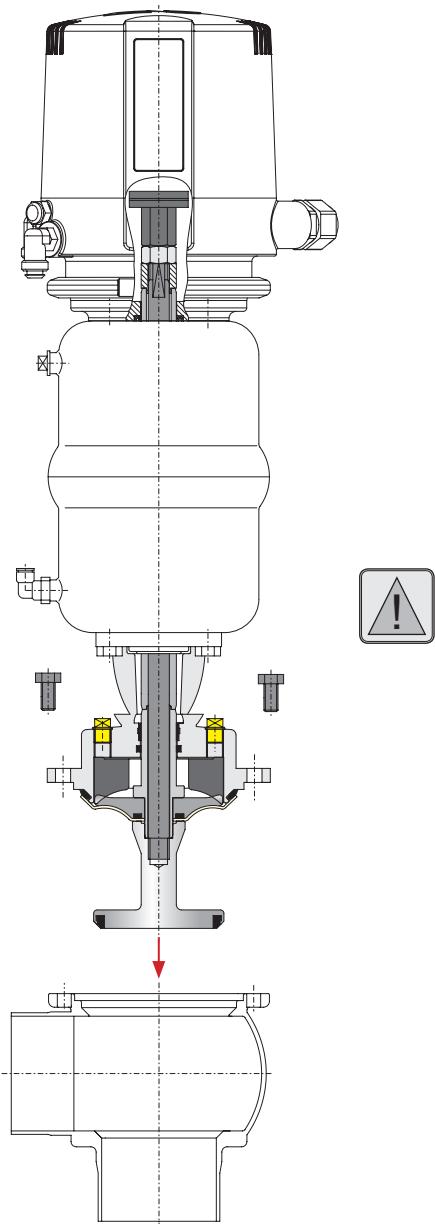

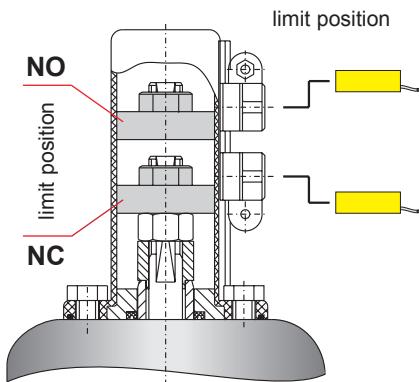

fig. 11.4

11.4. Installation of MS4 valve

1. Design with control unit:

Fasten the adapter on the actuator.

Place the control unit (26) on the adapter (27) and fasten it with the ring.

Design with valve position indication:

Fasten the housing of the valve position indication (24).

2. Version NC: During the assembly of the valve insert observe the following:

- Control the actuator (version: NC) with pneumatic air min. 6 bar.
- Carefully place the valve insert into the valve housing.
- The diaphragm (5) must not be damaged during the installation in the valve housing. Tighten the hex. screws (14) crosswise in the housing flange.

Do not reach for movable parts!

Risk of injury.

! Version NC: Shut off air supply.

3. Check the basic adjustment of the valve position indication.

- By turning the positioning screw in the control unit, the shift points can be adjusted.

4. Design with valve position indication:

Push in the proximity switches and fasten them.

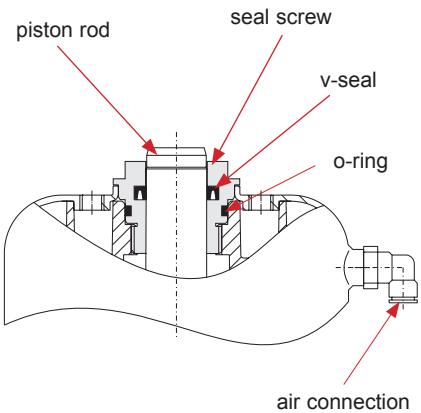

Readjust the proximity switches if necessary.

5. Adjustment of proximity switches: (fig. 11.4)

- Drive the actuator into a limit position.
- Drive the corresponding proximity switch into the corresponding position. For this purpose release the positioning screw and move the holder until the corresponding signal is indicated. Then, continue to slide the holder by 2 to 3 mm in order to secure the indication. Fasten the positioning screw.
- Position the actuator in the other limit position and carry out the positioning of the second proximity switch.
- Upper valve position indication:
valve NO "normally open" (air-to-lower, spring-to-raise)
- Lower valve position indication:
valve NC "normally closed" (air-to-raise, spring-to-lower)

12. Service Instructions - Actuator

12.1. Maintenance of Actuator

1. Remove the air hoses from the actuator.

2. Remove the inner hexagon screws from the adapter of the control unit. - Remove the adapter.

12.2. Dismantling of seals

1. Unscrew the two seal screws with a spanner SW 30 while holding up the actuator with a strap wrench.
2. Remove o-rings and v-seals.

12.3. Installation of seals and assembly of actuator

1. Die Install the slightly greased o-rings and v-seals in the seal screws (fig. 12.3).
See to the right direction of installation of the v-seal.
2. Push the seal screws over the piston at both sides of the actuator and tighten them.
3. Fasten the adapter of the control unit and the yoke on the actuator.

Attention! Position des Adapters beachten.

Attention! Consider the required valve design NC or NO during the installation of the adapter and the yoke.

NC (FS) =	normally closed (air-to-raise, spring-to-lower)
NO (FH) =	normally open (air-to-lower, spring-to-raise)

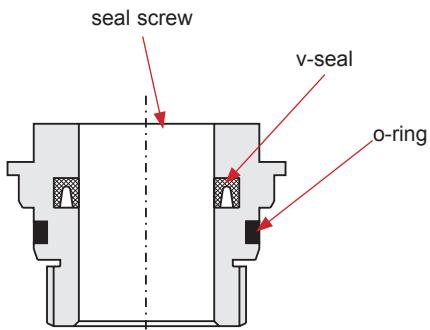

4. Fix the air hoses.

10.4. Reconstruction of valve design from normally closed (NC) to normally open (NO)

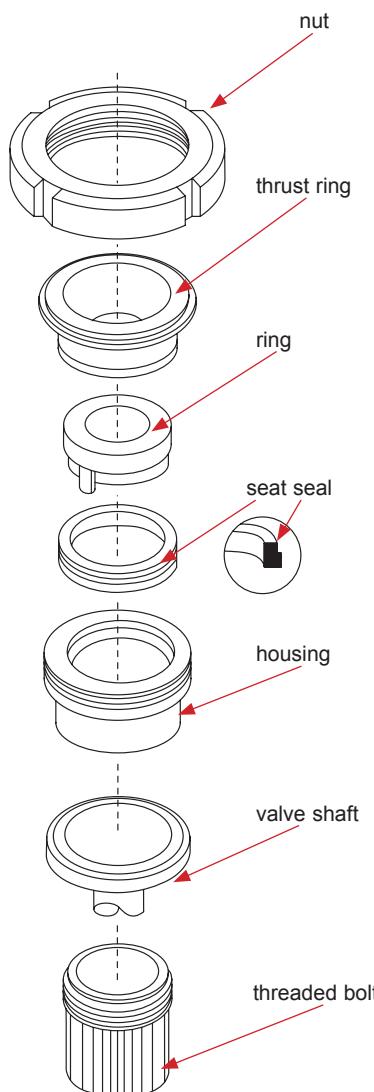

By turning the actuator by 180° the required design NC or NO can be selected.

NC (FS) =	normally closed (air-to-raise, spring-to-lower)
NO (FH) =	normally open (air-to-lower, spring-to-raise)

fig. 12.3.

13. Service Instructions - Assembly Tool

Attention: By means of the assembly tool the seat seal of single seat valves can be installed, only.

The assembly tool consists of:

- nut
- thrust ring
- ring with venting plug
- housing
- threaded bolt

13.1. Installation of the seat seal in the valve shaft

Insert the valve shaft into the housing in such a manner that the seal groove is in the valve housing.

Clamp the shaft in the housing by the threaded bolt.
Clamp the housing in a vice.

Slightly grease the seat seal (16) with APV assembly grease. Then pull the seal onto the ring until stop by means of the venting plug.

Introduce the ring with the seat seal into the housing and press it down until it stops.

Insert the thrust ring into the housing. Screw on the nut and tighten it until stop by means of a hook spanner.

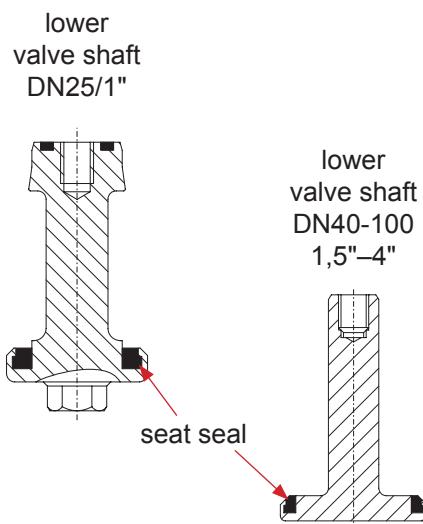

Release the nut. Pull the ring and thrust ring out of the housing.

Take the housing out of the vice, unscrew the threaded bolts. Take the valve shaft out of the housing.

Check the correct fit of the seat seal.

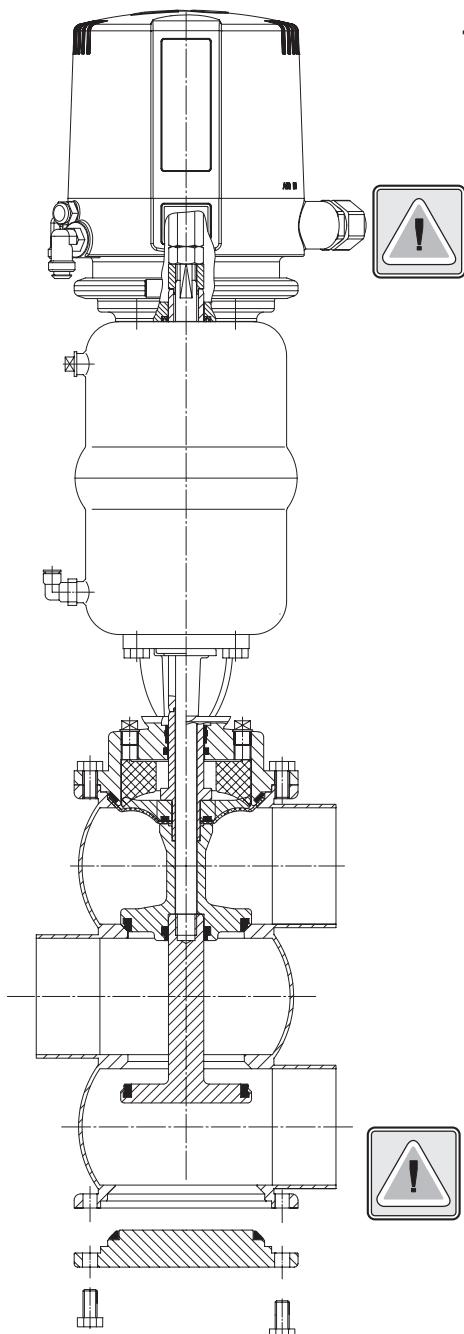

13.2. Installation of seat seal for change-over valves

Press the slightly greased seal at four spots, the wide side to the front, into the groove. At the four loops sticking out, the seal must be guided into the groove with a blunt screwdriver, for example, and pressed in by means of strong thumb pressure. Alternately work at all four loops to get an even fit of the seal. Finally the seal is smoothed under strong pressure, e.g. by the handle of a screwdriver and vented by pricking the blade of a screwdriver between the groove edge and seal inner side down to the groove bottom.

14. Service Instructions - Change-over valves

**Change-over valve
DELTA MSES4
(NC design)**

Change-over valves DELTA MSES 4

The item numbers refer to the spare parts drawings

MSES4: DN design : RN 01.064.12
Inch design: RN 01.064.12-1

14.1. Dismantling from the line system

1. Shut off the line pressure and discharge lines if possible.
2. NC version: Control actuator with air.

**Do not touch movable parts!
Risk of injury.**

- **Design with control unit:**

Remove the cover of the control unit.

Unscrew the actuator screw and the lock nut (28) while holding up the centering washer (27).

Detach the centering washer.

Design with valve position indicator (proximity switch holder):

Remove the cover (30) of the actuator (23).

Unscrew the actuator screw (29) and the lock nut (28) while holding up the centering washer (27).

Detach the centering washer.

3. Remove the hex. screws (22). Remove the housing cover (20), detach the o-ring (21).

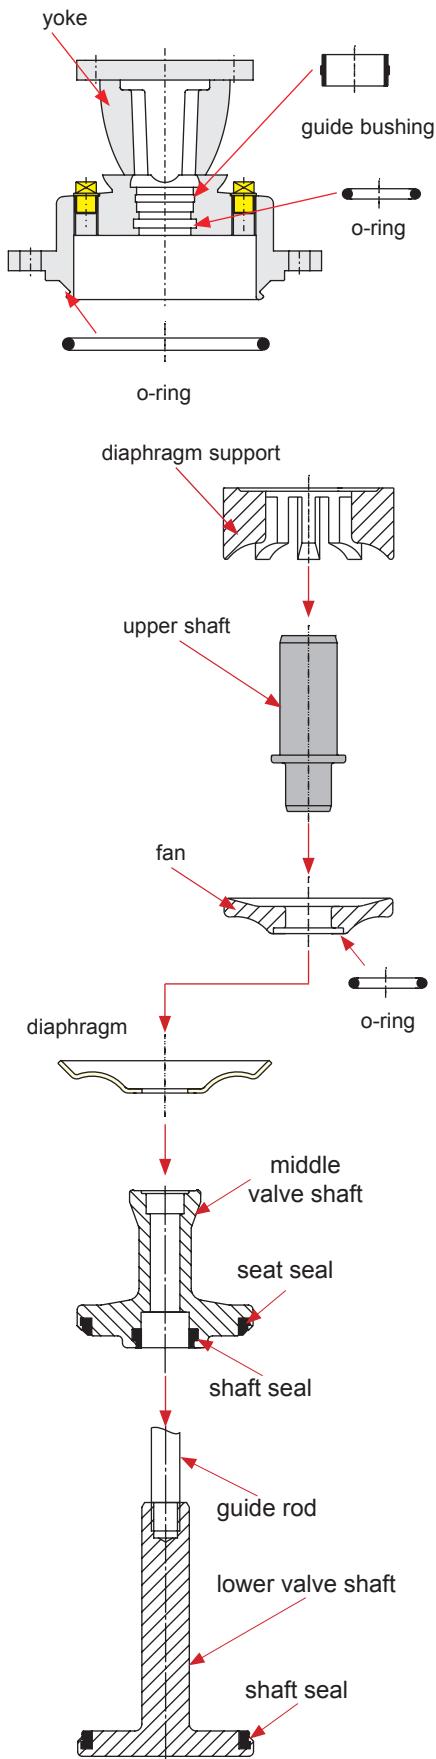

4. Extract the lower valve shaft (3) with guide rod (11) to the bottom out of the housing. In case of stiffness, knock on the guide rod by means of a rubber mallet while manually holding the lower valve shaft. Remove the seat seal (2).

- Only with the valves of the nominal dimensions DN 25 / 1" must the lower valve shaft (3) be unscrewed from the guide rod in the housing. (Use socket key SW 13.)

5. Design NC: Control with air.
Design NO: Shut off air.

**Do not touch movable parts!
Risk of injury.**

14. Service Instructions - Change-over valves

6. Remove the housing screws (17).
7. Lift the actuator (23) with yoke (12) to the top and out of the housing.
8. Remove the middle valve shaft (6), diaphragm (8), fan (9), diaphragm support (10) and upper valve shaft (7).
9. Remove the o-ring (19) from the fan.
10. Remove the seat and shaft seal (4, 5) from the middle valve shaft.
11. Detach the yoke from the actuator.
12. Take the o-rings (18, 16) and guide bush (14) out of the yoke (12).

14.2. Installation of seals and assembly of valve

1. Insert the guide bush (14) and o-ring (16, 18) in the yoke (12).
 2. Installation of lower seat seal (2) in the lower valve shaft (3) (see Assembly Tool, page 20).
 - **For nominal dimensions DN 25/1" only:**
Place the o-ring (4.1) into the groove of the lower valve shaft.
 3. Place the seat and shaft seal (5, 4) into the middle valve shaft (6).
 4. Insert the o-ring (19) in the fan (9).
 5. Place the diaphragm and fan on the upper shaft.
 6. Place the middle valve shaft with diaphragm (8), fan (9) and upper valve shaft (7) from the top into the housing and press the assembly together.
 7. Put the diaphragm support into the fan.
- ! Tooothing of fan and diaphragm support must interlock.**
8. Place the yoke onto the housing. Smoothly guide the upper valve shaft through the guide bush into the yoke. In case of stiffness, check the correct fit of the guide bush. Tighten the yoke screws crosswise.

14. Service Instructions - Change-over valves

9. Design NC:

Control the actuator with air.
Fasten the actuator with the hex. screws (13) on the yoke.

- Shut off pneumatic air.

10. Insert the lower valve shaft (3) with guide rod (11) from the bottom into the housing, push it up and keep hold of it.

Only with the valves of the nominal dimensions DN 25 / 1" must the threaded bore of the lower valve shaft be provided with a drop of a screw locker (Loctite) before screwing it together with the guide rod.

Afterwards, push the guide rod (11) from the top through the components and screw it together with the lower shaft (3) in the housing. (tightening torque $M_d = 30 \text{ Nm}$)

11. Place the centering washer (27). Apply a drop of a screw locker (Loctite - semi-solid) on the thread of the guide rod. Screw on the lock nut (28) and tighten it with a tightening torque of $M_d = 40 \text{ Nm}$. Hold up the centering washer during this process.

- **Design with control unit: Tighten the plastic actuator screw.**

! Design with valve position indicator:

Fasten the metallic actuator screw as the lock nut.

12. Insert the o-ring (21) in the housing cover (20) and tighten the housing cover crosswise.

13. Design with control unit:

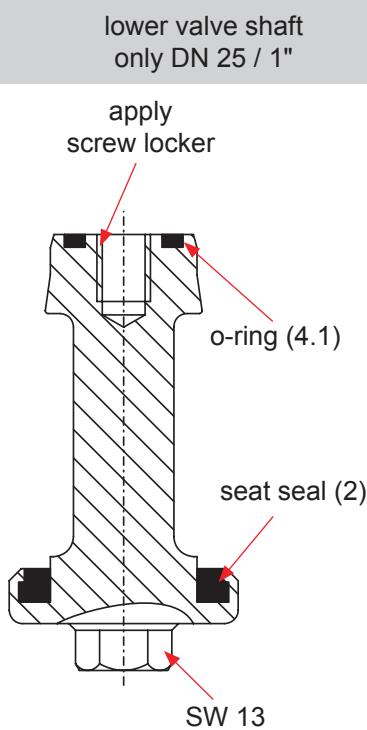

Place the control unit and fasten it accordingly.

Design with valve position indicator:

Place the proximity switch holder and fasten it accordingly.

Insert the proximity switches and fasten them.

Readjust proximity switches if necessary. .

15. Trouble Shooting

Failure	Remedy
Valve closed and pressure in upper housing	
Valve is untight.	Replace seat seal (2). Check line pressure (max. 10bar).
Leakage at the leakage bore in the area of the valve yoke	Check tightening torque of lock nut. Replace diaphragm (5) and o-ring (16).
Leakage between housing and yoke flange	Replace o-rings (15).
Actuator	
Air escapes at the actuator rod.	Replace o-ring (2) at the upper part of the actuator.
Actuator does not work (air escapes permanently from the venting plug).	Replace the complete actuator.
Valve position indication	
No feedback.	Carry out fine adjustment.

16. Spare parts lists

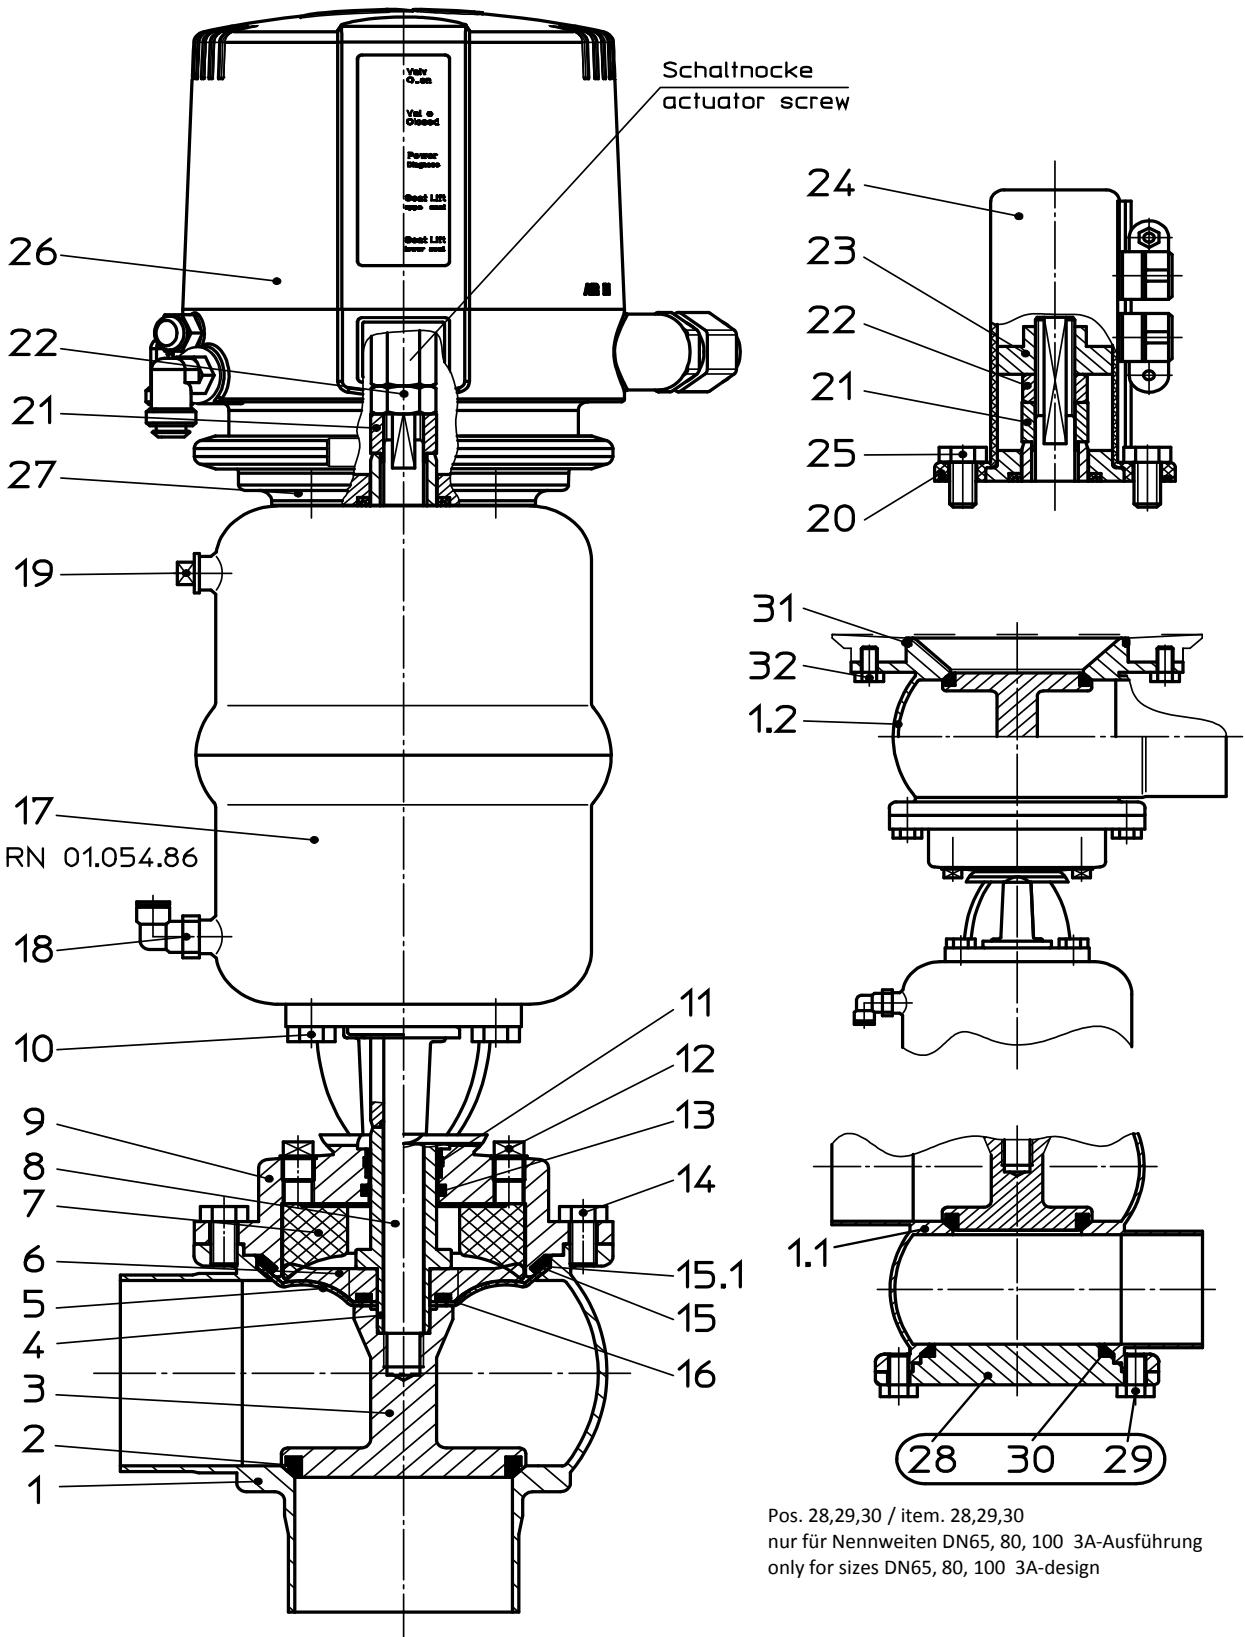

(see annex)

The reference numbers of the spare parts for the different valve designs and sizes are included in the attached spare parts drawings with corresponding lists.

Please indicate the following data to place an order for spare parts:
 - required number of parts
 - reference number
 - designation.

Data are subject to change.
